

Synchronize user groups from Entra ID

Within ATLAS, there are two options to synchronize user groups from Entra ID to ATLAS.

- **Option 1:** Based on group naming. This is supported by all subscriptions of Entra ID.
- **Option 2:** Directly through the enterprise application. This is supported by all paid subscriptions of Entra ID.

➤ **Option 1 (free tier) based on group naming**

All groups configured in Entra ID called ATLAS will be synchronized in ATLAS.

Entra ID groups

<input type="checkbox"/>	AA	ATLAS Administrator
<input type="checkbox"/>	AI	ATLAS ITRS
<input type="checkbox"/>	AM	ATLAS Management

This synchronization can take up to 5 minutes.

➤ **Option 2 through enterprise application**

Groups linked to the ATLAS-auth enterprise application, which is automatically set up after connecting to ATLAS, will be synchronized.

A	ATLAS-auth
---	------------

By clicking on the enterprise application, you can go to users and groups and select ‘add user/group’. here you can select any group in Entra ID, no matter the name.

- Steps to execute:**
- Login to Entra ID
 - Go to ‘enterprise applications’
 - Click on ATLAS-Auth
 - In the ‘manage’ section, click on ‘users and groups’
 - Click on ‘add user/group’
 - Click on ‘none selected’
 - Change from ‘all’ to ‘groups’
 - Click on the groups you would like to select and press ‘select’
 - You can now see how many groups are selected. If everything is correct, click ‘assign’.

Make sure the Global Admin is in one of the Entra ID groups for the first time login into ATLAS.
ATLAS only synchronizes groups, not individual users.
This synchronization can take up to 5 minutes.
