# ATLAS for Multi-Tenant Facilities

## Less Administration for Property Managers & More Self-Sufficiency for Tenant Managers

Managing access for multi-tenant facilities presents challenges such as automating administrative procedures, providing flexible access management for tenant managers, and ensuring the use of digital keys for simplified movement. ATLAS addresses these issues, enhancing security and convenience for property managers, and tenants!

### The Challenge

- As a property manager, managing tenant access across workspaces is time-consuming and laborious. Physical keys are prone to loss and replication, and changing locks is costly.
- What's more, administering access control systems in these environments involves distributing cards and setting individual access profiles for each tenant's employees.

### Our Solution

- With ATLAS, property managers can effortlessly allocate digital keys to tenant managers and contractors, setting the locks they choose for mobile entry, all through our Web Portal.
- Sharing digital keys is seamless with WhatsApp, or any other messaging app on your phone! This allows tenant managers to easily oversee access to areas like parking, entrances, and individual units, as well as switch or revoke access from their phones.
- With a simple one click set-up that allows you to add wireless locks to the Web Portal, you'll save time and costs with no local infrastructure required.

# Value for Property Managers

|   |  |
|---|--|
| ➤ Granular Access Control   | Under ATLAS, the property manager serves as the central authority, managing the overall system configuration through the Web Portal, while tenant managers oversee access permissions for their office space users via mobile. This includes tracking and easily revoking access privileges when needed. |
| ➤ Improved Contractor Management  | Eliminate contractor key collection for daily tasks such as cleaning and maintenance. You can seamlessly add and manage contractors through our WebPortal or via WhatsApp, defining entry times and specified areas with access for smoother daily operations.   |
| ➤ Effortless Access Management  | Say goodbye to expensive cylinder replacements, lost certified (master) keys and unauthorized access issues. Digital keys are securely stored and managed through the ATLAS app.   |
| ➤ Welcome a New Tenant Easily   | Just update the Web Portal with the new details and deactivate previous ones.  |
| ➤ One-Click Commissioning of Wireless Hardware without Local Infrastructure | Easily wake up the lock, add it to the Web Portal with a single click, and complete the setup in minutes.  |
| ➤ Building Access Security  | Continuous delivery of updates with data and privacy protection policies,along with strict compliance standards.   |
| ➤ Smart Access Event Management Through API                                 | Easily track and store access events. Export event data seamlessly to third-party tools with a single click, while ensuring long-term storage for self-service lookups.  |

# Value for Tenant Managers

|                                    |   |
|------------------------------------|---|
| ➤ Effortless Key Sharing           | With WhatsApp or anyother messaging app, you can seamlessly share digital keys with office space users and just as quickly remove users via mobile.     |
| ➤ Unlock Your Phone and Open Doors | ATLAS runs in the background, eliminating the need to search through multiple apps, saving time and increasing the efficiency of daily office movement. |
| ➤ Supplier & Contractor Access     | You can share access via WhatsApp for maintenance, cleaning, and deliveries at scheduled times.   |

# Values for Installers

|                                     |  |
|-------------------------------------|--|
| ➤ Hassle-Freee Setup With One Click | The process of setting up ATLAS is highly efficient, requiring no additional/specialized training. Simply wake up the lock, click, and within a minute, seamlessly add it into the Web Portal for property owners. |
| ➤ Reduced Investor Costs            | Without complicated cables and local infrastructure, installation is quicker, saving time and money.   |
