ATLAS for Retail

Simplify Your Access Management and Streamline Daily Usage

Digital Key & Access Management represents a transformative shift beyond simply replacing mechanical locks with software-driven access. It's an opportunity to streamline your entire access management operations – it's access at hand.

The Challenge

- **Commercial Grade Keys**
Losing certified (master) keys can lead to costly replacements, duplications, or even full lock cylinder replacements.
- **Access Management**
Ensuring secure access for store managers, employees, suppliers, and maintenance personnel can be a logistical nightmare.

Our Solution

- With ATLAS, property managers can effortlessly allocate digital keys to store managers and contractors, setting the locks they choose for mobile entry, all through our Web Portal.
- Sharing keys is seamless, facilitated via email, WhatsApp, or any other messaging app on your phone. This enables store managers to conveniently oversee entire store access including switching and revoking access all from their phones.
- With a simple one click set-up that allows you to add wireless locks to the Web Portal, you'll save time and costs with no local infrastructure required.

Value for Property Managers

➤ Granular Access Control	Under ATLAS, the property manager serves as the central authority, managing the overall system configuration through the Web Portal, while store managers oversee access permissions for their employees via mobile. This includes tracking and easily revoking access privileges when needed.
➤ Improved Contractor Management	Eliminate contractor key collection for daily tasks such as cleaning and maintenance. You can seamlessly add and manage contractors through our Web Portal or via WhatsApp, defining entry times and specified areas with access for smoother daily operations.
➤ Effortless Access Management	Say goodbye to expensive cylinder replacements, lost certified keys (master key) and unauthorized access issues. Digital keys are securely stored and managed through the ATLAS app.
➤ Welcome a New Tenant Easily	Just update the Web Portal with the new details and deactivate previous ones.
➤ One-Click Commissioning of Wireless Hardware without Local Infrastructure	Easily wake up the lock, add it to the Web Portal with a single click, and complete the setup in minutes.
➤ Building Access Security	Continuous delivery of updates with data and privacy protection policies, along with strict compliance standards.
➤ Smart Access Event Management Through API	Easily track and store access events. Export event data seamlessly to third-party tools with a single click, while ensuring long-term storage for self-service lookups.

Value for Store Managers

➤ Key Sharing	With WhatsApp (or any other messaging app), you can seamlessly share digital keys with employees and just as quickly remove users via mobile when they leave the organization.
➤ Unlock Your Phone and Open Doors	ATLAS runs in the background, eliminating the need to search through multiple apps, saving time and increasing the efficiency of daily staff movement.
➤ Simplified Shift Processes for Managers & Employees	Store managers can grant access to the whole store while also setting expiry dates when needed, for example, in the case of temporary contracted employees.
➤ Supplier & Contractor Access	Shop managers can provide access for maintenance, cleaning, and deliveries at scheduled times.

Values for Installers

➤ Hassle-Free Setup With One Click	The process of setting up ATLAS is highly efficient, requiring no additional/specialized training. Simply wake up the lock, click, and within a minute, seamlessly add it into the Web Portal.
➤ Reduced Investor Costs	Without complicated cables and local infrastructure, installation is quicker, saving time and money.
