

Register Your Mobile Device

ATLAS provides a self-service portal where employees can register and de-register their mobile devices without the help of a system admin. Since ATLAS utilizes mobile, there is no need for physical card-management anymore.

- >

Register your mobile device

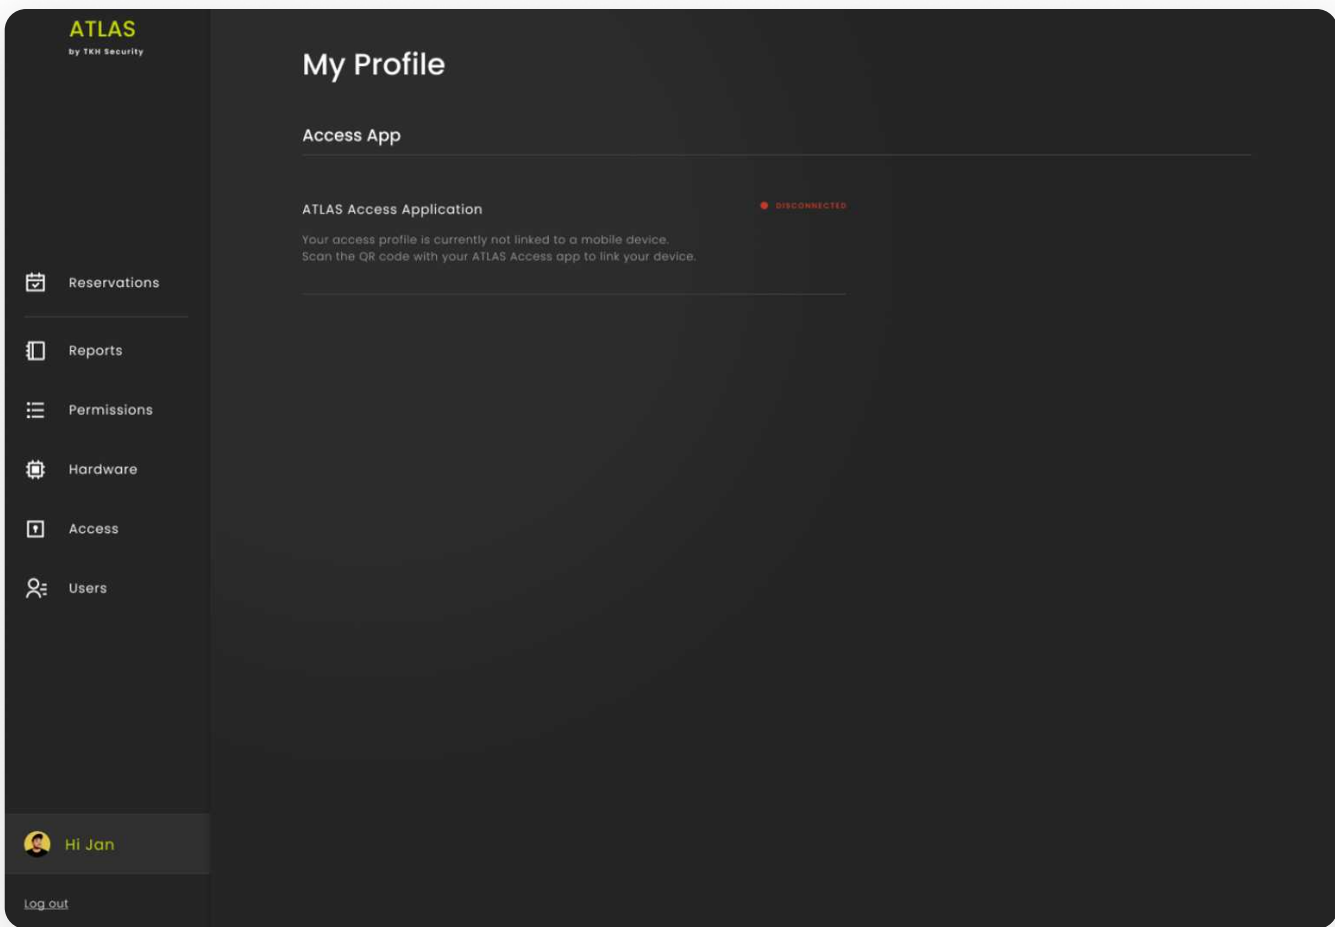

When an employee logs into ATLAS, ATLAS will check if a mobile device is registered. If not, the employee will be asked to register a mobile device first by showing the personal registration QR code.

- >

Swap your mobile device

Sometimes an employee will get a new mobile device. Therefore, it's possible to swap it within the ATLAS portal and register your new mobile device by clicking on 'My Profile'

When the employee hovers over their mobile device in the portal and clicks EDIT, a drawer will appear. From there, the current device can be disconnected, and a new QR code will be generated.
