Process Efficiency Improvements

Eliminating Physical Passes
85% - Time Reduction in Administration

User Management – Less than 1 Hour/Month

Seamless Contractor Management Through WhatsApp

First Installation Preparation – Just a Couple of Minutes

Adding a Lock – Less Than 60 Seconds

Values for End–User

01. Access Through Your Phone

- Simply unlock your phone to open doors – ATLAS runs in the background saving you time searching through Apps.
- Share Access with WhatsApp or any other messaging app on your phone. System administrators and those with appropriate permissions can share access keys with external users e.g. temporary employees & contractors.
- Your phone is always up to date with latest developments – This ensures you never miss out on important updates and innovations.
- No more keys or access cards – ATLAS provides secure keyless entry to your space.

02. Flexible, Scalable & Secure

- Decentralized digital key. Log in with a Microsoft account, and scan the QR code to add the digital key to your phone.
- Seamless integration of Microsoft or third tools (through API) users – Any updates done in Microsoft or third tool are instantly reflected in ATLAS.
- Scale access demands and adapt as your business changes. Tailored to your evolving needs, simply increase or decrease user numbers as and when required.
- Secure & hassle-free access through Single Sign-On to all your tools with just one login, reducing password risks and keeping your data protected.

03. Access Without Local Infrastructure

- Only lock on door - no additional infrastructure such as entry/exit gates needed for access.
- Add locks with just one click - wake up the lock, click, and within a minute seamlessly add it into the Web Portal.
- Wireless hardware – eliminate the need for complex wiring enabling easy installation.
