

Case Study

SC Cambuur

Kooi Stadion, NL

The Kooi Stadion is a vibrant football arena located in the Dutch town of Leeuwarden. As the home of SC Cambuur, a proud club with over 50 years of history, it welcomes up to 15,000 passionate fans who bring energy and excitement to every match, embodying the heart and spirit of Dutch football.

Challenge

- Effectively monitoring a wide range of dynamic zones—such as entrances, stands, concourses, VIP areas, locker rooms, and parking lots presents a challenge especially in ensuring comprehensive coverage and timely responses.
- Keeping track of crowd density, spotting access breaches, and managing parking lots effectively becomes a real challenge during events without clear, intuitive tools.
- Difficulties in identifying and retrieving critical video footage across multiple cameras during high-pressure events, which hampers real-time decision-making and post-event analysis.

Solutions

- 01.** High security through customizable monitor layouts with VDG SENSE and integrated 4K PTZ, Fixed and Fisheye cameras.
- 02.** Ensuring a secure and exceptional experience at football and other large-scale events, security teams can easily switch between layouts for real-time monitoring and efficient incident response.

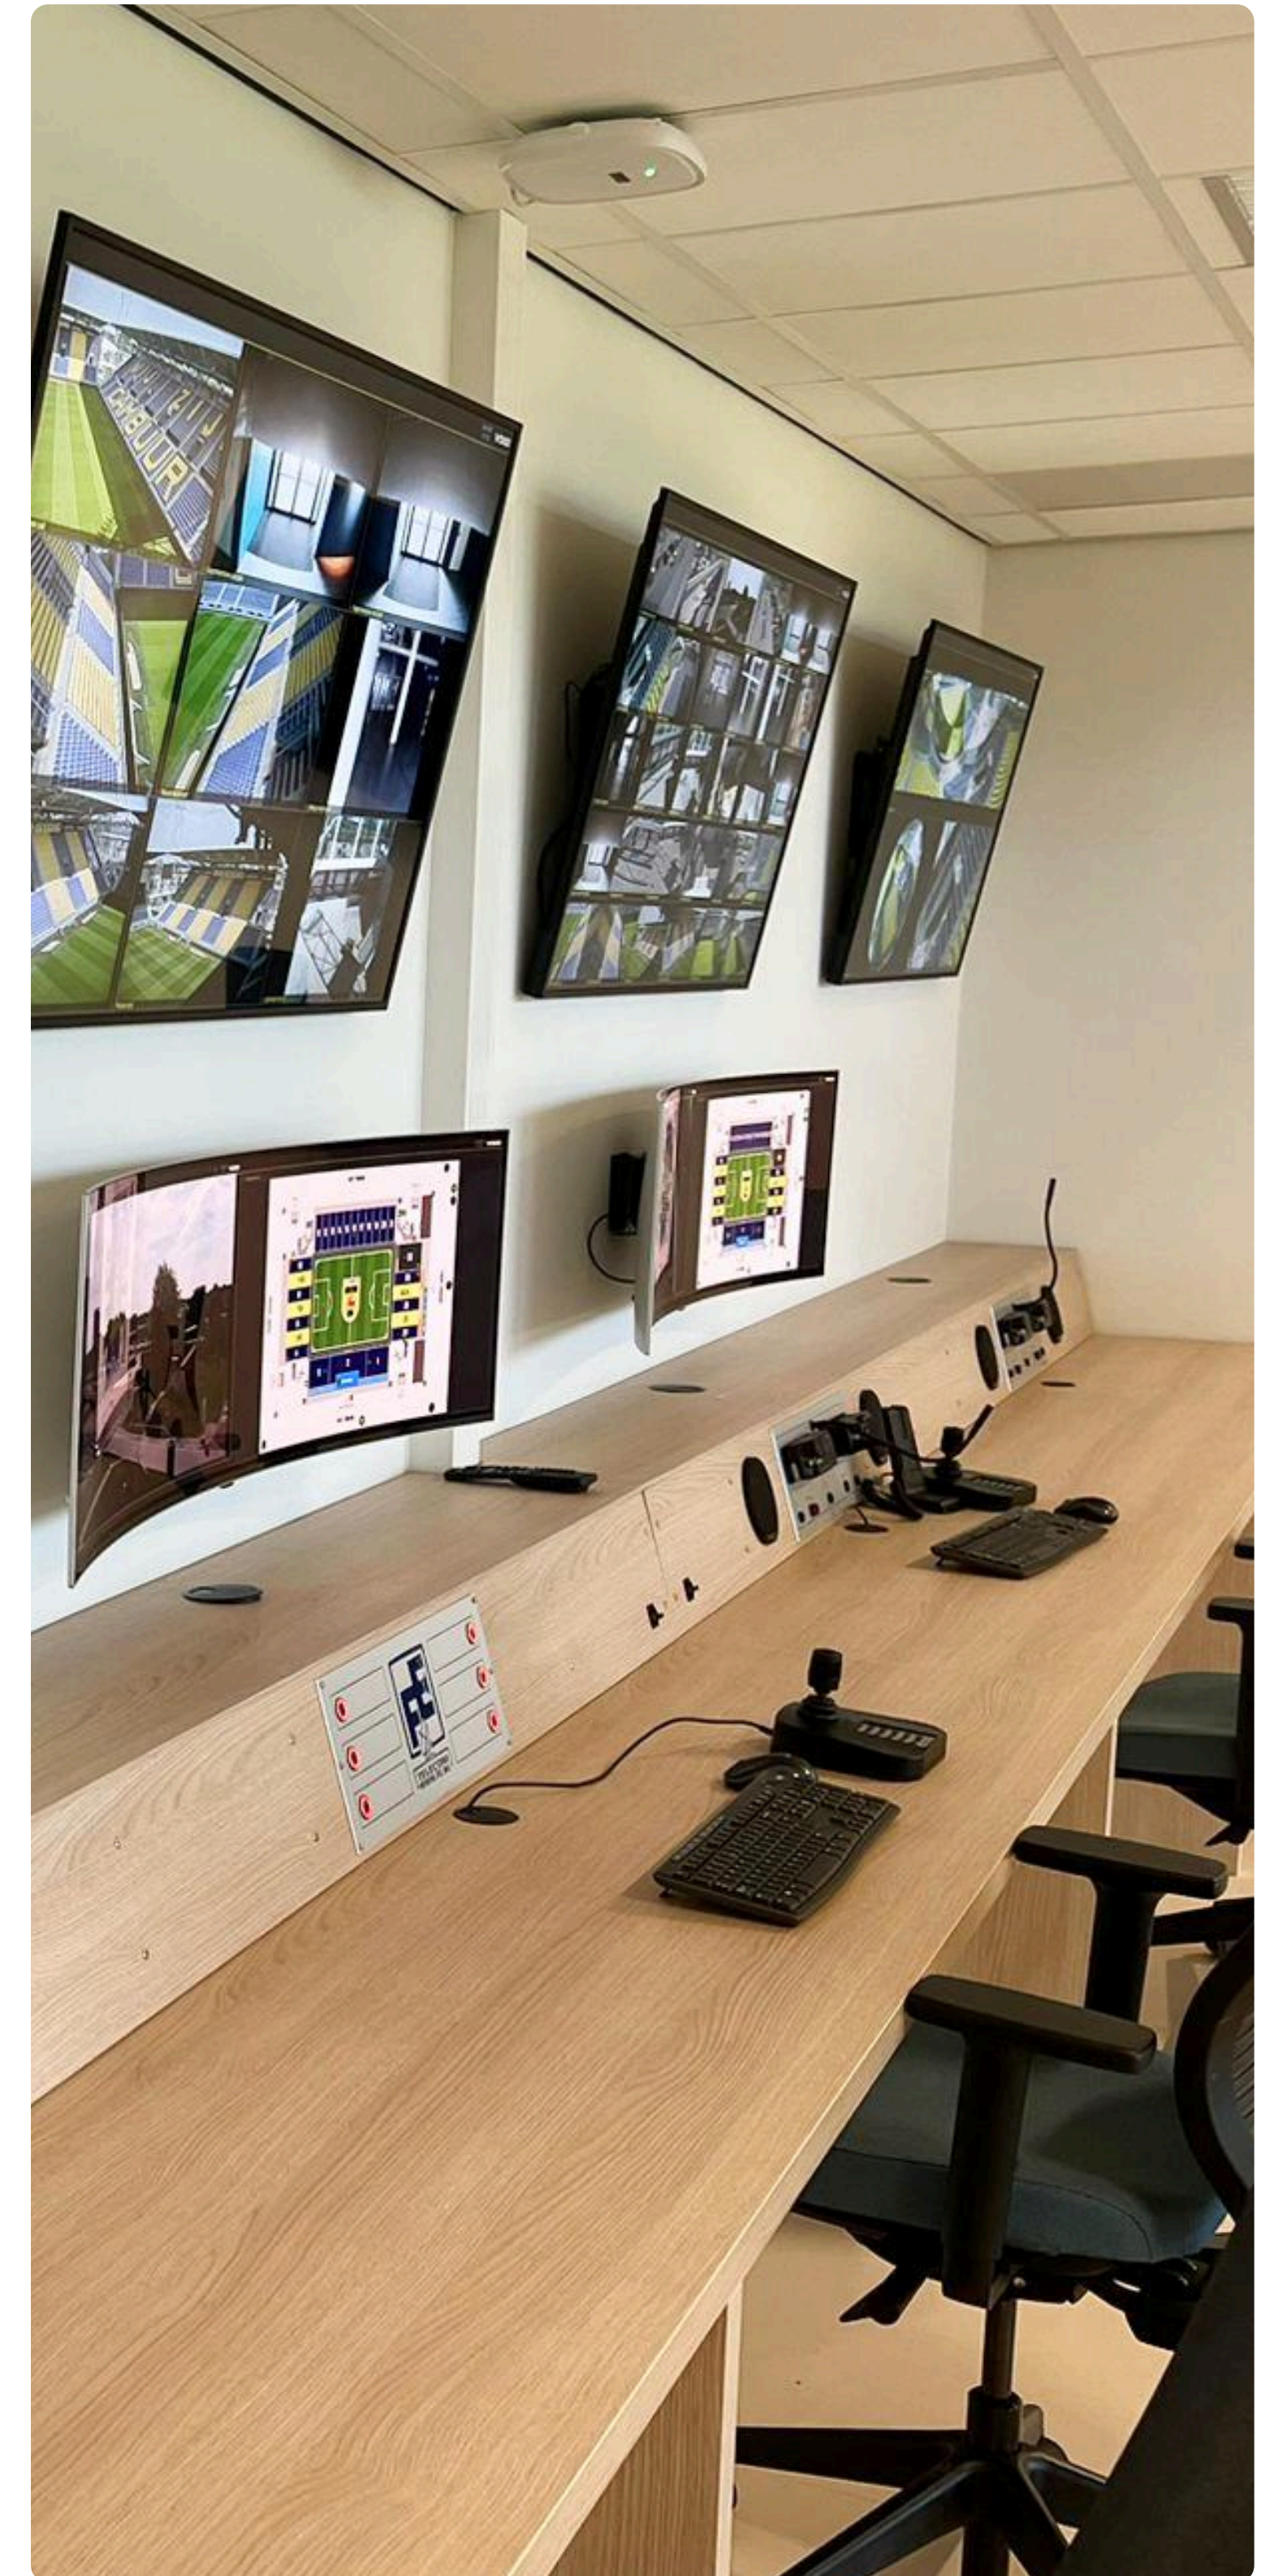

Personalized to user roles, these solutions include:

- Safety in critical areas of the stadium through real-time monitoring.
- Quick access to previously flagged or critical footage through Event Search and Tagged Video Overview.
- Easy playback/review of past footage supporting post event analysis.
- Comprehensive understanding of specific activities through Event Descriptions, Timelines, and Alerts for actionable insights.

Efficiently Review Bookmarked Footage:

During football matches or large-scale events, operators can flag key incidents (such as a crowd surge at the entrance or a disturbance in the stands), making it easier to retrieve and review the footage later for analysis or as evidence.

- Bookmark and tag specific footage by date, time, and camera, ensuring quick reference during or after the event.
- A dedicated search layout allows easy access to all bookmarks for specific cameras, whether from live feeds or pre-recorded footage.

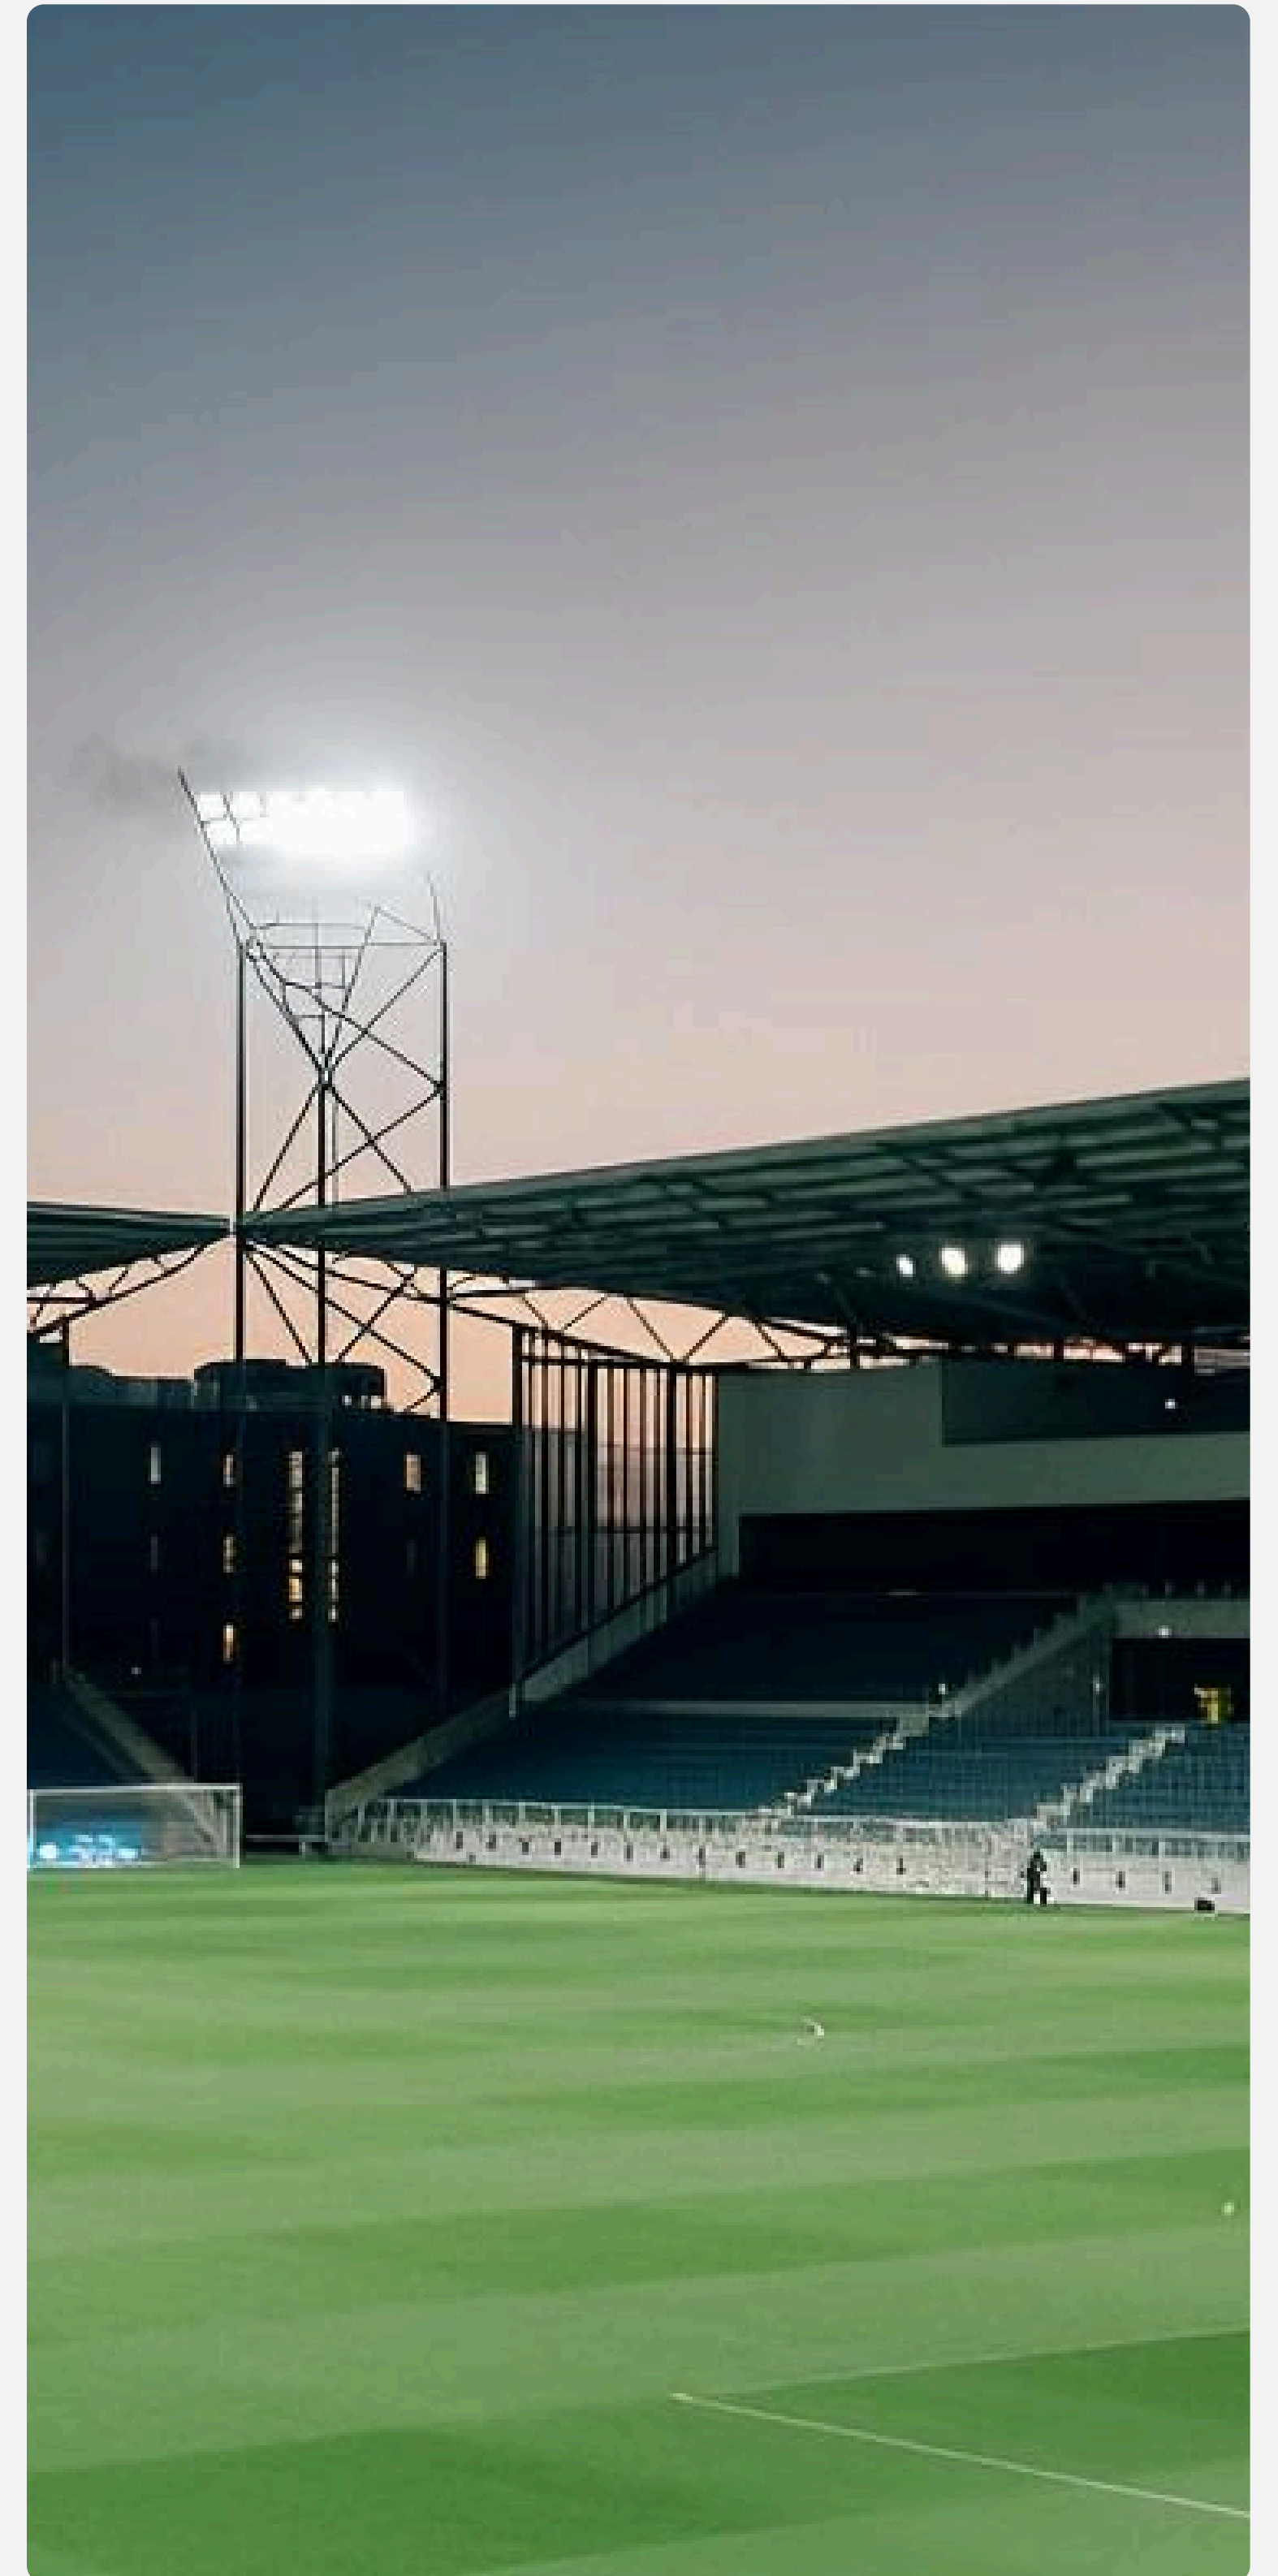

"We are proud to have collaborated with TKH Security to deliver a cutting-edge **Video Management System** for SC Cambuur's stadium. By leveraging our technical expertise, we ensured optimal camera placement for comprehensive coverage and efficiency. This advanced system enables real-time monitoring during daily operations and major events, providing seamless functionality and peace of mind for operators and visitors alike. Our successful partnership underscores a shared commitment to innovation and exceptional security solutions."

Johan de Haan
Partner Installer – FE Telecom

"At TKH Security, we combine industry expertise with innovative solutions to address the unique challenges of stadium security. Our partnership with SC Cambuur highlights how our advanced **Video Management System** ensures efficient monitoring of high-tempo events, managing crowd flow, enhancing spectator safety, and quickly identifying potential risks in dynamic stadium environments."
