ENiQ® Security Ecosystem solutions

DIGITAL HANDLES

The ENiQ Guard

Let the Guard handle it.

We'd like you to meet the Guard – proving you can be tough and durable, without foregoing a clean and classy design. Our digital door handles, part of the ENiQ line, safely secure any interior door you place them on, and look good while doing it.

All different models of the Guard share the same DNA, have a clear family

resemblance, and can be further customized with different handles, ensuring they match both your security needs and interior design. As with any ENiQ product, the Guard is easily integrated into your ENiQ Security System, and can handle any task you throw at it.

Benefits

■ DESIGN

Compliment any interior design with the Guard's clean and classy looks. Multicolour informational LED lighting combined with the choice of several high quality stainless steel design handles ensure the Guard always is a true eyecatcher.

■ CAREFREE

Thanks to the long stand-by time and large number of locking cycles per battery, maintaining the Guard is a carefree experience.

Changing the battery is done in a matter of seconds, and emergency openings are a thing of the past.

■ BUILT TO LAST

Our digital door handles are built to last. Robust and strong, the Guard can endure in any environment, boasting the highest grade-of-use (Class 4 certification in preparation in accordance with EN 1906 / prEN 16867).

■ TROUBLE-FREE

Mounting the Guard is an

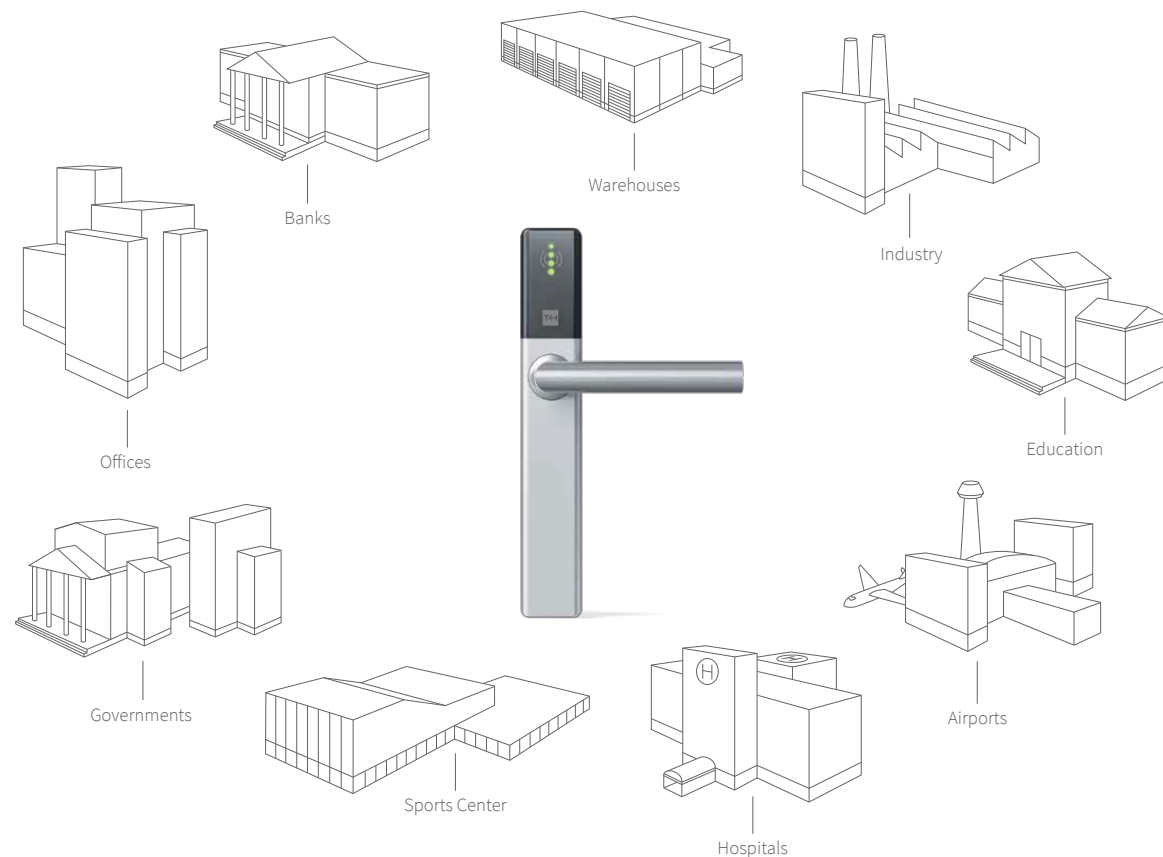

effortless endeavour, requiring little to no preparation.

■ SUITABLE FOR ANY DOOR

The Guard is easily fitted on any door, including fire- and smoke protection doors, and emergency exits (T90 in preparation/EN179/EN1125). Compatible with retrofit doors and all European interaxis dimensions, and can be overruled with a mechanical key when needed.

ENiQ® Security Ecosystem solutions

DIGITAL HANDLES

It's all about you

But we're here if you need us.

The DOM ENiQ system is designed to work for you, not to make you work. It allows you to create an unbeatable custom security system, no matter how demanding or specific your wishes. At the same time,

we appreciate that setting up a system like this might not be something you do on a regular basis. That's where your trusted security expert comes into play. They know all the ins and outs of our products and will gladly

help you create your perfect security solution. We're always here for you if you need a helping hand; before, during, and long after the installation of your Digital Security Ecosystem.

The best of both worlds

Unifying mechanical and digital locking solutions.

Within the DOM ENiQ Security Ecosystem, you can easily create tailor-made security to fit any situation, no matter how big, small or complex. Our extensive library of digital solutions is at your disposal, designed to provide you with

uncompromised and future-proof control. The ENiQ Security Ecosystem even allows you to seamlessly integrate our digital locking solutions into your existing mechanical system. Thanks to the DOM ClipTag - a high security transponder designed to fit

nearly any and all DOM mechanical keys – you can expand our feature-rich digital experience to all your locks. Unify your mechanical and digital systems with ENiQ and unlock endless possibilities – your Digital Security Ecosystem by DOM.

Two systems, one key.

“We see customers become increasingly demanding when furnishing their offices, so matching digital handles to their doors and interior design in shape and colour is an excellent option.”

DIGITAL HANDLES

The Slim- and Wideline variants

The perfect handle for every door and situation.

The Slimline is a stylish solution that perfectly matches and enhances the look of modern interiors. It's suitable for both new and existing doors, including tubular frame doors with small backsets under 25mm. When replacing your existing fittings

for digital handles, the Guard Wideline allows you to save time and money. With its generously proportioned frame, it easily masks any damage or signs of use from previously placed locks. Despite its 56mm wide cover, almost no new drilling holes are needed.

The Guard Compact is suitable for existing doors with round, oval rosettes. It's available in both a Slimline and Wideline variant, and models with a rosette can always be overruled with a mechanical key.

Product features

CUSTOMIZABLE	POWERFUL	RELIABLE
▪ Easily screwed through and onto doors. ▪ Variants: No cylinder (blind), Europrofile, Swiss round cylinder (22mm). ▪ Multi-colour LED with dynamic light signaling.	▪ Excellent test results with Lithium: Up to four years or 70,000 battery locking cycles (Lithium batteries, 2x AAA L-cells 1,5V). ▪ 10 years of data storage in case of power loss.	▪ Long product lifecycle: minimum of 200,000 door opening activations. ▪ Class 4 certification in preparation (in accordance with EN1906 & prEN 16867). ▪ Full compatibility list with existing panic locks for Emergency Exits.

Beauty in details

The Guard is available in three classic colours.

Matching the look and design of your interior doesn't stop at finding the perfect handles for your doors. A subtle but equally important finishing touch is selecting a complimentary colour. For this reason, the Guard is available in three classic colours, ensuring that each and every detail of your interior shows thought and consideration.

Applications

- Offices and administrative buildings.
- Hospitals, clinics, and retirement homes.
- Banks and hotels.
- Public spaces, such as shopping malls and restaurants.
- Schools, and universities.

Handle details

- 9mm Handle spindle with adapter to 7-8-8.5-10mm.
- DIN Left and Right adjustable onsite.
- Upward and downward (max. 45°) handle movement.
- Up to 7° compensation for rest position of the handle.
- Perfect design for installation on tubular frame doors with a small standard backset, which prevents your hand from accidentally getting caught behind the handle.

Integrated with

MAKE THE ENIQ GUARD TRULY YOURS

Whatever type of building you manage, the Guard's stylish yet universal design makes it the perfect upgrade for any door. Its user-friendly character is further strengthened by the battery choice, allowing for long-lasting performance and easy maintenance.

ENiQ door handles are future-proof and easily set up to function and behave any way you want - through intuitive online connectivity and PC software, using the handy ENiQ app, and configured with transponders or key cards. It truly is your lock, and your choice.
